

Excite

DYNAUDIO

You can't
eat it.
You can't
drink it.
You can't
mate with it.
Why does it
keep
making
you happier
than almost
anything else
in the world?
**The all-new
Excite
series.**
True to the
music as only
a Dynaudio
can be.

True high-end sound. A truly smart, sophisticated design. Easy to pair with lots of amps. Masterfully built. **The new Excite loudspeakers.** In four stunning finishes, perfect for any room.

Ludwig.
Playing with
the big boys
has never
been more
fun: the
Excite X38.

The mother of all bass: **X38**

More sound volume, more detail, more high-end: The Excite X38 achieves a deep, powerful and vibrant sound quality, even in larger spaces.

The Excite flagship model X38 utilizes two 18cm diameter woofers featuring characteristic Dynaudio driver technologies, including: lightweight but rigid MSP cone membranes, extraordinarily large 75mm diameter aluminium voice coils with powerful center magnet systems, and high-strength die-cast aluminium frames.

That's how the X38 achieves its resounding bass, thrilling dynamics and incredible control. The midrange driver also utilizes MSP, thus ensuring a seamless integration with the woofers, while the tweeter's coated fabric dome guarantees the finest resolution and high frequency detail. With its meticulously selected crossover components and optimized dispersion characteristics, the X38 combines its energetic, dynamic presentation with a remarkably balanced, three-dimensional portrayal of the recording.

The extensively braced cabinet is available in a choice of fine natural wood veneer or satin lacquer finishes, while the removable cloth grille is discretely secured via concealed magnets. A notable feature is the integrated feet: depending on the flooring surface, the X38 can stand on four resonance-absorbing rubber feet or four height-adjustable spikes.

Mr. Scott,
energize!
Who says
you can't
fly in an
armchair: the
Excite X34.

Transcend time and space: **X34**

Slim line design that fascinates with a distinguished presentation: The Excite X34 is an elegant, high-end, floor standing loudspeaker, whose sheer sonic output and incredibly three-dimensional soundstage belies its modest dimensions.

The X34 is a particularly discreet loudspeaker, measuring less than 95cm tall and only 17 cm wide, but its dual MSP mid/woofers, coated soft dome tweeter and special dispersion character convey an unmistakably high-end sound quality. With its extremely lightweight aluminium voice coils, greater driver membrane radiating area, and larger enclosure volume than a compact speaker, it can produce a deep, powerful bass response even in spacious rooms. Precise fine-tuning of the crossover yields an optimized dispersion, which further enables an incredibly accurate, three-dimensional presentation of the recording. The X34 is also extremely amplifier-friendly due to its 8 Ohm impedance.

The exquisitely finished cabinet includes a cloth grille secured by concealed magnets, and features a particularly smart base construction: on hardwood floors, the X34 can stand on four resonance-absorbing feet, while four adjustable integrated spikes may be used to achieve a perfect foundation on carpeted surfaces.

How on earth
can a speaker
this small
transform your
listening room
into a sacred
space? The
Excite X14.

Right on the spot: **X14**

Ultra-compact but undeniably high-end: The Excite X14 brings an extraordinary level of sophistication and refinement to the compact loudspeaker category.

The X14 is the most compact Excite model, yet delivers true high-end sound quality to any system by virtue of its long-excursion mid/woofer, refined soft dome tweeter and first-class crossover components. The exquisite sonic balance, underscored by an unbelievably deep, fast and perfectly controlled bass response is a rarity in this price class. A Dynaudio specialty plays a major role: extremely lightweight aluminium voice coils and exceptionally large, powerful magnet systems are utilized in the X14 tweeters and mid/woofers. The music signal reproduced is graced with incredible precision, dynamics and accuracy. Moreover, the X14 is easy to drive with a wide range of amplifiers, due to the amp-friendly 8 Ohm impedance.

The beautifully crafted cabinet is equally refined: exquisite natural wood or satin lacquer finishes ennoble the rigid, solid enclosure while the minimal distance between tweeter and mid/woofer serves to improve timing and phase. The Dynaudio Stand 3X and Stand 6 speaker stands, SF1 speaker feet, and assorted wall mount brackets are perfect accessories available for optimizing placement of the X14.

A black and white photograph of a modern living room. The room features a large, wide-screen television mounted on a wall. In front of the screen is a low-profile, black leather sofa with a matching ottoman. The floor is made of large, light-colored square tiles. A long, black soundbar is positioned on the floor in front of the screen. The room is supported by several thick, black cylindrical pillars. The overall aesthetic is clean, minimalist, and futuristic.

We have you
surrounded.
Drop your
prejudices,
raise your
glass and
melt right
into the
action: The
Excite
X24 Center.

Easy to set up, even more easy to enjoy: **X24**

Captivating Excite sound quality in your home theater: The easy-to-set-up, compact X24 Center rounds out the Excite Series as the ideal solution for surround systems.

The X24 features dual mid/woofers flanking a fabric dome tweeter, while its 8 Ohm impedance renders it a perfect match with any AV receiver in a modern, high performance home theater. A seamless, enveloping sound and homogenous integration with the Excite main and surround loudspeakers is achieved via the shared MSP driver cones, soft dome tweeter diaphragms, lightweight aluminium voice coils and large magnet systems.

Even the dispersion character is a perfect fit with the Excite multi-channel system. Set-up is particularly simplified: the X24 is exceptionally compact, and features an integrated base/foot that allows upward angling for improved directivity. It can also be removed to facilitate installations where space is minimal, or supplemented by a Dynaudio wall mount bracket. The X24 cabinet features a magnetically-attached front grille and is available in the four standard Excite finishes to offer optimal aesthetic integration into any living space.

The best musicians in the world and the top studios produce on Dynaudios. There isn't a single reason why you should reproduce music with anything less. **Dynaudio is all about music.**

Dynaudio.

Some guys
have all
the fun.

Thanks to the Danes we have speakers:
As early as in 1819, Hans Christian Ørsted discovered the basics of every loudspeaker: electromagnetism. In 1915, the first dynamic speaker was developed – also by a Dane. For more than 35 years, Dynaudio, in Danish Skanderborg, has specialized in authentic music reproduction via loudspeakers.

The Dynaudio engineering team relies on its own innovations in all aspects of the development, materials selection and manufacturing processes. Special attention is paid to even the most minute detail. Dynaudio speakers are a unique combination of innovative technology, the most modern production techniques, precision craftsmanship and Danish sensitivity. This kind of input is out of the question for most speaker manufacturers – but at Dynaudio in Denmark it is the basic requirement for the company's legendary audio experience.

High-precision analytical tools and digital simulation processes make it possible for Dynaudio to build speakers that are perfectly designed and increasingly more accurate – but even after development there's still the decisive Dynaudio fine-tuning. Because music remains the essence that can only be captured by feeling.
